

New agent

What type of agent would you like to create?

Browse Templates

Could you see whether I have any urgent outstanding emails?

Sure, let me check.
You've got one urgent email from your manager about tomorrow's meeting. Want a quick summary?

Personal Assistant

Can you tell me more about pricing?

Absolutely! We offer three plans, Starter, Pro, and Enterprise. Want a quick breakdown, or should I help you pick the best fit?

System prompt

4. Maintain a positive community atmosphere:
- Ensure all interactions contribute to a supportive and educational environment.
- Offer encouragement and support for students' learning journeys.

Success is measured by student satisfaction with the support provided, the clarity of information delivered, and the overall positive engagement within the channel's community.

Guardrails

Never provide personal opinions or speculate on unconfirmed future content; stick to official information. If a request is outside the scope of the channel (e.g., personal tutoring, unrelated technical support), politely redirect the student. Do not engage in debates or arguments; maintain a helpful and neutral stance. If you don't have the answer, transparently state that you will look into it or direct them to where they might find the information. Avoid making promises about release dates or features that are not officially confirmed. Do not share any private or sensitive information about the channel, its creators, or other students.

Asadullah AI Youtube Channel Description

Text Content

Welcome to Asadullah AI — your ultimate launchpad for mastering Agentic AI, Deep Learning, and Production Automation.

We don't just watch theory here; we build. This channel is designed for developers, students, and AI enthusiasts who want to engineer real, production-ready systems from scratch. Get hands-on, project-based tutorials every single week.

What We Master on This Channel:

Agentic AI: Autonomous frameworks with LangGraph, LangChain, & RAG.

Computer Vision: Object detection, tracking, and visual models.

Fine-Tuning & NLP: Customizing LLMs for specialized use cases.

MLOps: Deploying models to scalable production environments.

Workflow Automation: Enterprise-grade AI automation using n8n.

Full-Stack AI Projects: End-to-end apps using FastAPI, React, & APIs.

About Me:

I'm Asadullah Shehbaz, an AI Engineer, Data Scientist, and Kaggle Grandmaster (Peak Rank #26) with a BSCS in Machine Learning from GCU Lahore.

Subscribe to start building today!

From Twilio

From SIP

From Exotel

Choose how you want to get started

Trial

Limited access to explore and test Twilio with free credits

[Continue with trial →](#)

Nonprofit and government customers can [unlock more free credits & discount pricing →](#)

Plan benefits:

- Get 1 pre-assigned trial phone number
- Send messages and make calls to a sandbox-like environment
- Connect with up to 5 verified customers in your own region

Fastest way to start building

Pay as you go

Unlimited access to our full suite with no monthly fees or commitments

[Continue with pay as you go →](#)

Fast track to integrate with 3rd party applications

Plan benefits:

- ✓ Unlock any sender phone number to fit your needs
- ✓ Lift restrictions to send messages and make calls to any destination
- ✓ Connect with all of your customers globally
- ✓ Access additional channels like RCS and WhatsApp
- ✓ Get higher priority customer support
- ✓ Earn volume discounts as you scale

Personalize your onboarding 16%

Which best describes you?

- ☒ Business
- ☐ Government
- ☐ Hobbyist or student
- ☐ Non-profit
- ☐ Sole proprietor or self-employed

Advanced Security

Multimodal input

Configure how user input is sent and which input types are enabled for this agent.

☐ Enable chat mode
Create text-only conversational agents that do not process audio.

☒ Allow file attachments
Let users attach images and PDFs in chat when the selected model supports multimodal input.

Max files per conversation
The maximum number of files that can be uploaded during a single conversation.
10 Files

Automatic Speech Recognition

Configure how the incoming audio is processed and transcribed into text.

This ASR setting is locked because Turn V3 requires Scribe v2 Realtime.

ASR model

Select the speech recognition model for transcribing user audio.

Scribe v2 Realtime

☐ Filter background speech
Enable background voice detection to filter out far field human speech.

User input audio format

Select the input format you want to use for automatic speech recognition.

PCM 16000 Hz Recommended

Conversation Initiation Client Data Webhook

Configure how the conversation initiation client data is fetched when receiving Twilio or SIP trunk calls.

Fetch initiation client data from a webhook

Post-call Webhook

Override the post-call webhook for this agent. You can configure the default webhooks used by all agents in your workspace settings.

Learn how to automate post-call workflows with ElevenLabs & n8n

Post-call webhook

Create Webhook

No post-call webhook configured.

Limits

Configure conversation limits and timeout durations

Daily call limit

The maximum number of calls allowed per day.

100000

Calls per day

Concurrent call limit

The maximum number of concurrent calls allowed.

-1

Using subscription limit

Enable bursting

If enabled, the agent can exceed the workspace subscription concurrency limit by up to 3 times, with excess calls charged at double the normal rate.

Create a Webhook

Please enter the webhook callback URL, name and configure the authentication method to use. Once created, these details cannot be changed.

Enter a valid display name for the webhook

Asadullah AI Webhook

Enter a valid callback URL

https://8-246.ngrok-free.app/webhook-test/e89e87

Type {} to insert an environment variable. Only supported in the Agents Platform. [Learn more](#)

Webhook Auth Method

HMAC

HMAC will generate a shared secret used to sign all webhook payloads. You should verify the "ElevenLabs-Signature" header using this secret.
